Titan
- size, atmosphere and temperature
- but why atmosphere? It's a moon, and it's far away!
- Voyager 2: a smoggy moon
- composition of the moon, composition of the atmosphere
- Cassini + Huygens: Titan is Earth-like!

Wait, Earth-like? Liquid, boulders, volcanoes, dirt, dunes

Life on Titan?

The concept of a habitable zone

Will Earth freeze or burn if it moved ±1 mile?

Being in the habitable zone does not guarantee habitability

Habitable zones evolve

If life was found on Europa, would that change our perception of the habitable zone?

Are Venus, Earth and Mars in the habitable zone?
